

Wednesday Challenge Form

Group Members: Joey's Group

Problem Statement: Pass a marble through the group to a bucket on the other end through segments of PVC pipe

Approach: Form a human pipe passing chain

Solution: We used only 4 of the pipes we had and passed them through the group till we reached the end. We did have some leadership difficulties as those who could lead kept fighting against themselves instead of cooperating to beat the other team.

Lessons Learned: instead of fighting with each other, an effective team will establish a hierarchy and follow the established leadership instead of fighting.
